REMARKS :

original valve spring info is not available

REMARKS :

- # - cast iron camshafts
- available in steel billet (on request)
- # The VANOS (VVT) system on the intake camshaft changes the valve timing:
 - M50TU /B20: from 105° to 80° (exhaust: 105° fix)
 - M50TU /B25: from 110° to 85° (exhaust: 101° fix)The data are shown for full intake retard (disengaged VVT). Check distance between valves and piston to be 1mm at least with VVT engaged. Wrong installation will cause severe engine damage!
- # ONLY for dirt track applications and pro street use with adjustable engine management or carburetors
